

# Cut Your Energy Costs & Make Money

Wednesday 19<sup>th</sup> November 2008

Okehampton Business Centre, Okehampton

7 pm – 9 pm

## Get help with Renewable Energy Sources and Energy Efficiency to significantly reduce your consumption

Renewable energy is derived from essentially inexhaustible sources, such as the wind, sun, water or replaceable sources such crops. Easily accessible renewable energy technologies include solar water heating, solar photovoltaic, ground source heat pumps, small scale wind turbines, small scale hydro systems and biomass heating systems.

### Ask the experts and get answers to your energy questions

- Identifying your renewable energy options
- Assess technologies and installers
- Develop your financial case
- Access grants and loans
- Address planning issues

Don't miss this opportunity to analyse your company's carbon impact, investigate new technologies and payback time frames

This event is **free of charge** and, as such, places are allocated on a first come first served basis. To reserve your place simply complete this form and return to us via one of the options below: -
